Discover,  
Ignite, Develop

## June Holiday Programme

Issued in: June 2013

“Kids were introduced to Egyptian alphabet – hieroglyphs and making of papyrus diary!”

### Week 1

### “Time Machine”

3,000 year-old mysteries unwrap as the children visited the Singapore Art Science Museum “Secrets of the Tomb” exhibition. Children had a chance to learn the secrets of the mysterious Egyptian burial practices and mummification process. They also had a chance to immerse themselves in a 3D film experience that narrates the "virtual unwrapping" of the 3,000-year old mummy of Egyptian temple priest *Nesperennub* - whose original cartonnage coffin has never been opened - to unveil the story of his life and death.

“Can you guess who this Mummy is?”

## Week 2

## "Nature Heroes"

*"Kids making their ideal Mother Earth" Let's save our planet Earth!*

*Our very special terrarium in a glass bottle! Bring nature closer to us!*

This week, kids had a chance to learn about the difference between genetically modified and organic food. Not only that, they brainstormed ideas and ways to help reduce, reuse and recycle the resources they have. Each of them knows that they can play a role in conserving our Earth resources. Also, they learnt to make their terrarium and understand the scientific reasons behind the Terrarium.

## Week 3 "Food Frenzy"

## "We are all ready for the Khong Guan Biscuit Factory Tour"

*Kids' sandwich Competition*

Healthy food can be fun and appealing to kids. At our programme, kids had the chance to learn and prepare healthy meals. Kids got down to hands-on activities, from budgeting, to marketing and finally preparing a healthy splendid nutritional meal for themselves.

Not forgetting our sandwich competition, where kids worked closely together as a team to create their unique sandwiches that was loved by everyone.

"I learnt how biscuits are made. We saw huge ovens as long as 50-60 meters. We wore hairnets to prevent our hair from falling into the biscuit dough. A lot of effort is needed to bake biscuits."

Joanna Foo – Primary 2 Canossa Convent Primary School

*Buying ingredients from the market for our healthy dish!*
