

What's up during April?

Bonding Time

A time where the children get together to have fun and know one another more!

This is our finger twister game. Through this game, the children got closer to one another. Besides all the fun elements in this game, it taught children to persevere and not to give up even when they felt that they couldn't do it...

It's time to share....

Our Teddy managed to get a good deal from a nearby fruit stall. He treated his friends and teachers with fresh watermelon. **Irresistible** temptation for all of us! We had such a great time enjoying the big red **watermelon!**

Hands-on activities

The kids enjoyed themselves while making their own delicious cupcakes! The cupcakes were easy to make and were extra delicious with rainbow rice on top.

Tele-match Games

It's time for some outdoor activities where kids get to cooperate and work in teams. This time round, we made use of water as the main element of play.

Kids just love water. Competitive yet challenging is what these kids love.

Efon was one of our planners for the activities and plan to engage the younger ones to compete in the game.

Wow!!! Efon's Testimony

Before being part of SPARKS Student Care, Efon was rather negative at home, and he hardly joked with us. Now after joining our Student Care, he is more receptive at home and also more open to converse with us. Basically, he has become a more jovial person than before. We are partnering with his parents in order to help him focus on the "I can" and the positive. Instead of pressurizing him to do what we want him to do, we help him to do what he enjoys and is capable of doing. With constant partnership with his parents and feedback from teachers, we also try to build on his talents and make decisions together with him rather than telling him what to do.

"We're very satisfied with how our son has developed ever since he has been part of SPARKS, and we would like to wish them greater success!"

- Mrs Cheong
